

Meeting Agenda 1 - Team CKQW

Team Members: Xinyi Guo, Shiyu Chen, Qianqia Zhang, Winnie Zheng

- achieved & missed milestones from your project plan
No milestone has been missed. We met all the deadlines for this project so far.
- any difficulties that you encountered
None of us have experience with the interactive map api, so we need to look more into it. We will read the piazza post about interactive map api when we work on it for more information.
Aside from Fritter, this is the first experience for all of us to practice full stack, so a little worry about the frond-end implementation to meet with not only the general design but also the aesthetic standard.
- any changes made to your design or project plan.

No specific changes have been made to the design project plan. As of right now, we're considering removing a concept or two from our original plan after receiving feedback from Daniel.

Daniel proposed to do heavily on one or two of the concepts rather than shallow implementation of everything. So, most likely deleting the service request and the Q/A concepts from our original plan.

We wish to discuss:

- Feedback on our team / project
- Changes to our project plan: which concepts to keep?
- How to test our project since we do not have a staff provided front end?
