Project Title: interactive status map for Cambridge business during Covid-19

Project Description: We will build a website to show the operating status of Cambridge businesses. We will embed this information on an interactive map. Each business will also create have its own page, where its owner can provide latest news and further details about it, and customers can post questions or comments. Our app will provide Cambridge residents with quick access to accurate and up-to-date information about nearby businesses, and this is especially important under the COVID-19, as the operating status of businesses can change frequently. We also hope that our app will help local businesses by providing them with a tool to communicate with their customers and to answer/clarify any question.
